

Classification no. **T41. NATIONAL BUREAU OF STANDARDS—Cont'd**

**T41.1: Annual reports 4°**

(date) [There seems to be no report on the construction of standards of weights and measures after Prof. Hassler's appointment as superintendent of the Coast Survey, Aug. 9, 1832, except by correspondence, until 1856. In 1834 and 1835 the Coast Survey was under the Navy Department and the construction of standards of weights and measures under the Treasury Department, so it was not possible that there should be any reports of the latter in the reports of the Coast Survey. When the Coast Survey was again placed under the Treasury Department, in 1836, the annual reports of the Coast Survey usually included the operations of the construction of the standards of weights and measures. When the office was separated from the Coast and Geodetic Survey, in 1901, and it became the National Bureau of Standards, it began issuing annual reports.]
