[†] This Checklist ends with the publications of the calendar year 1909. The Railway Mail Service has since begun a new series of publications, necessitating an additional class under P10., the series title of which is as follows:

P10.10: Schemes of States (for use of publishers in distribution of 2d class mail)

[Gives names of post-offices arranged alphabetically, with indication of route separation for each.]

‡ Since Feb. 1908, the Topography Division has also prepared rural-delivery maps of counties in which rural-delivery is completely established. A uniform scale of 1 inch to 1 mile is used. The maps are drawings on tracing linen, and copies are reproduced by the sun-print process, but only in response to special calls. Since there are no regular printed editions of these maps, they are not included in this Checklist. The rural-delivery maps of counties should not be confused with the post route maps which are regularly published by the Topography Division and are classed under P11.5:
